Project Question: Which youth players should Manchester City use as rotational players for the first team.

1. Understanding what the dataset looks like, grouping clubs as best of Europe, league winners, top four contenders, top 10 contenders.

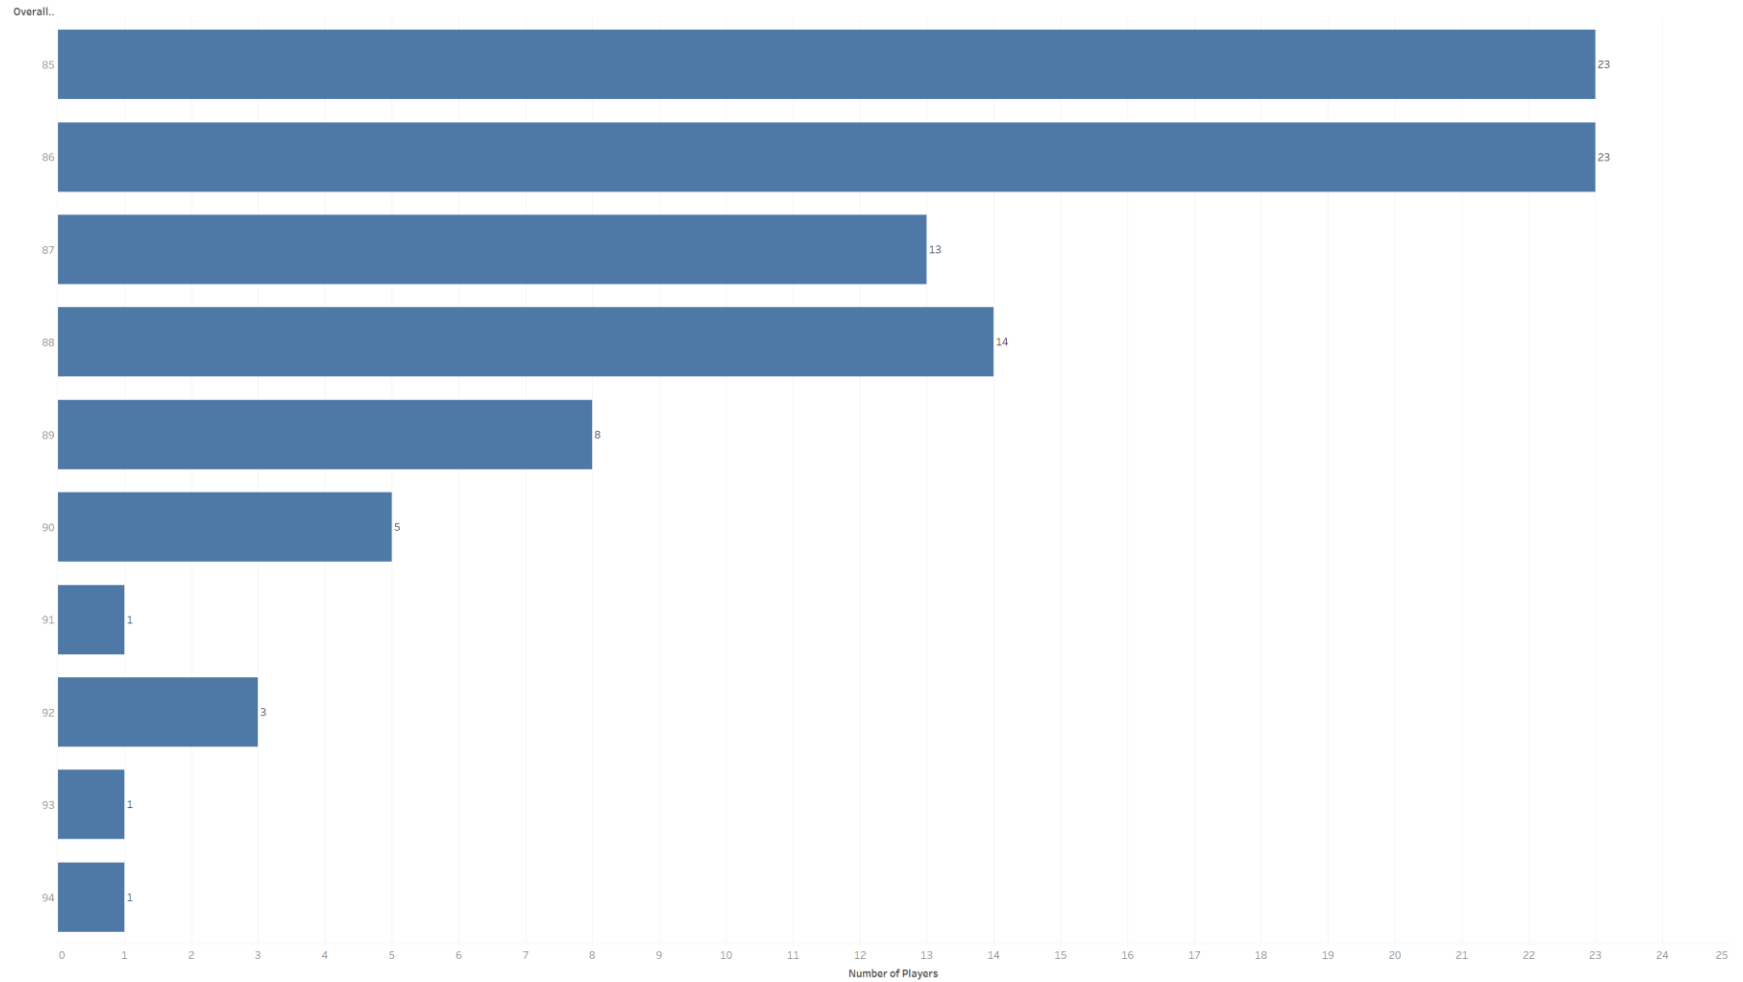

Club Value

Value
100,000,000

Clusters
■ Cluster 1
■ Cluster 2
■ Cluster 3
■ Cluster 4

2. Mapping which countries are producing the best players (rated 85+ overall)

Top Players Map

3. Breakdown of how many top players are in the market.

Players per Rating

Overall..

Overall	Number of Players
85	23
86	23
87	13
88	14
89	8
90	5
91	1
92	3
93	1
94	1

4. Manchester City: Analyzing attributes of top rated players.

Core Player Attribute Analysis
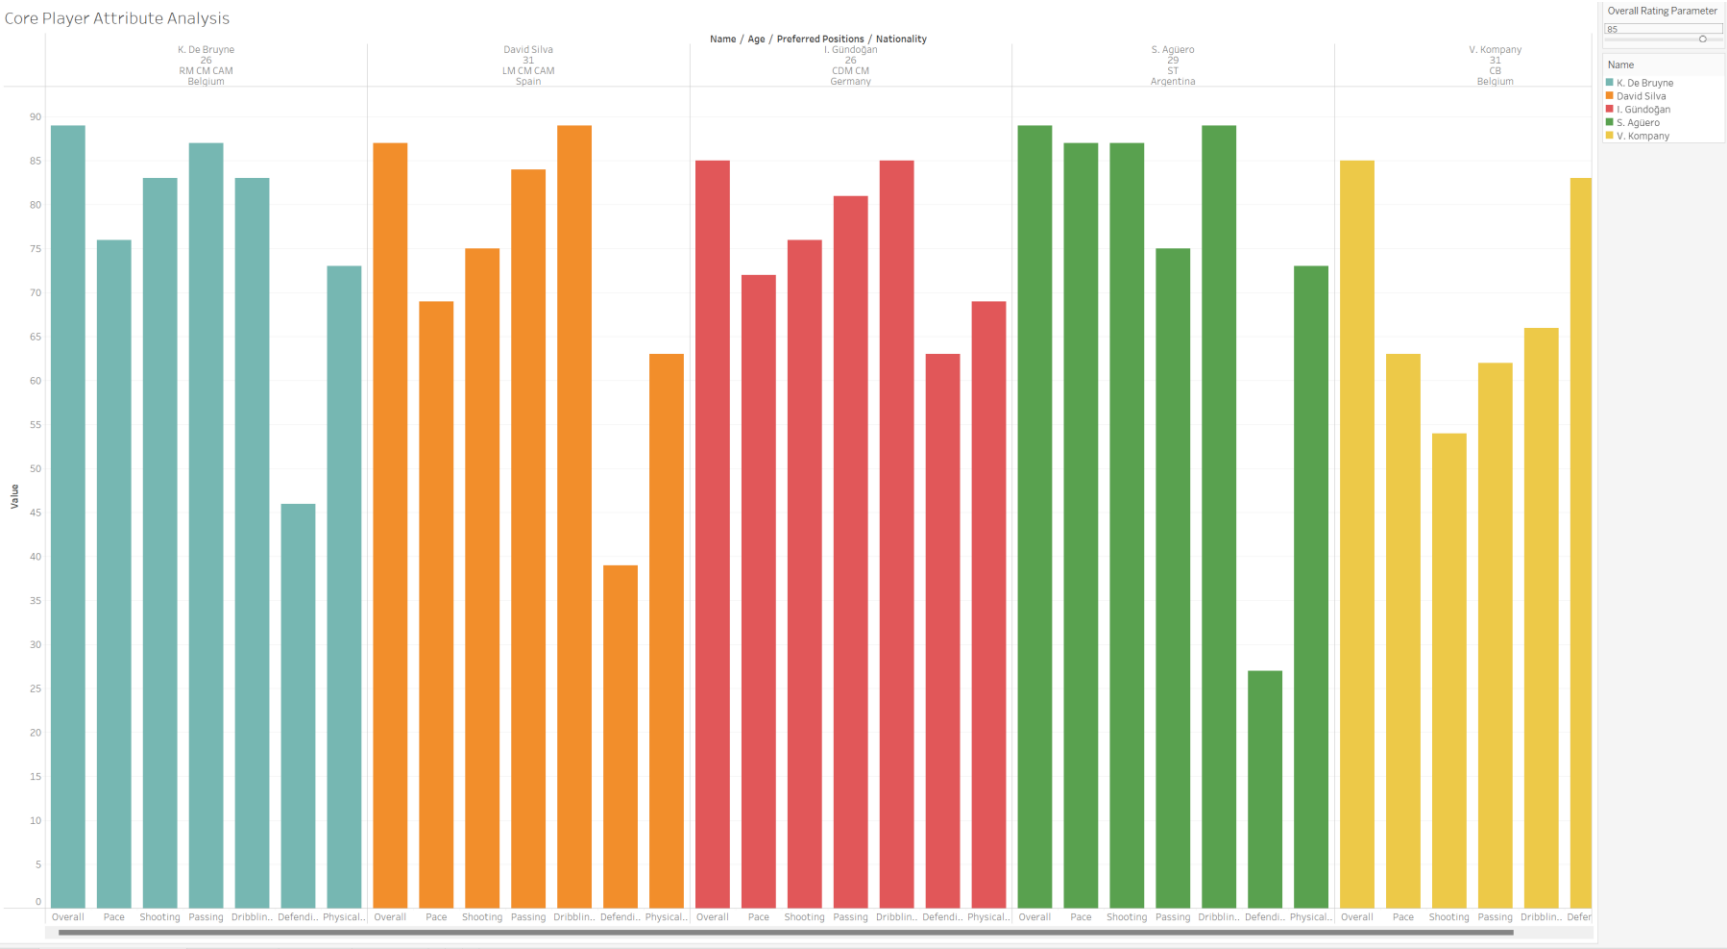

5. Manchester City: Visualizing players current ratings to their potential with current market values.

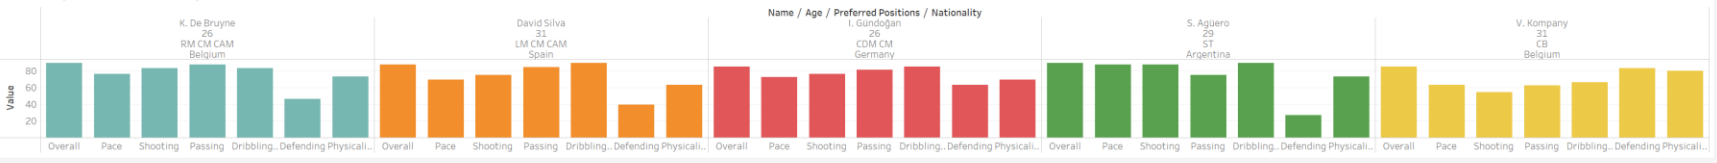

Potential Analysis

6. Analyzing top youth prospects and colouring them to core players they could potentially replace.

Manchester City Player Analysis
